Math 5740-1 Math Modeling
Student Questionnaire

Name:

To facilitate groupings of modeling teams, I need a rough idea of your background.

1. Please list any general mathematical software packages (*Maple, Mathematica, Matlab*, etc.) and programming languages (*C++, Java*, etc.) with which you have some familiarity.

2. Please list the Mathematics courses you have completed beyond Calculus (at least those you remember). Course titles are more helpful than course numbers.

3. Please list any area(s) outside of mathematics in which you have done significant course-work, or in which you have work experience.
