A Minicourse on Stochastic Partial Differential Equations

Salt Lake City, Utah, 2006

Editors: D. Khoshnevisan and F. Rassoul-Agha

Springer

Berlin Heidelberg New York

Hong Kong London

Milan Paris Tokyo

Contents

A Primer on Stochastic Partial Differential Equations

<i>Davar Khoshnevisan</i>	1
1 What is an SPDE?	1
2 Gaussian random vectors	2
3 Gaussian processes	2
4 Regularity of random processes	7
5 Martingale measures	14
6 The semilinear heat equation	22
7 From chaos to order	31
References	35

The Stochastic Wave Equation

<i>Robert C. Dalang</i>	37
1 Introduction	37
2 The stochastic wave equation	39
3 Spatially homogeneous Gaussian noise	44
4 The wave equation in spatial dimension 2	46
5 A function-valued stochastic integral	53
6 The wave equation in spatial dimension $d \geq 1$	55
7 Spatial regularity of the stochastic integral ($d = 3$)	58
8 Hölder-continuity in the 3-d wave equation	67
References	68

Application of Malliavin Calculus to Stochastic Partial Differential Equations

<i>David Nualart</i>	71
1 Introduction	71
2 Malliavin calculus	72
3 Application of Malliavin calculus to regularity of probability laws	81
4 Stochastic heat equation	88
5 Spatially homogeneous SPDEs	96

References	105
------------------	-----

**Some Tools and Results for Parabolic Stochastic Partial
Differential Equations**

<i>Carl Mueller</i>	107
1 Introduction	107
2 Basic framework	109
3 Duality	111
4 Large deviations for SPDEs	120
5 A comparison theorem	124
6 Applications	125
References	136

**Sample Path Properties of Anisotropic Gaussian Random
Fields**

<i>Yimin Xiao</i>	139
1 Introduction	139
2 Examples and general assumptions	143
3 Properties of strong local nondeterminism	153
4 Modulus of continuity	157
5 Small ball probabilities	162
6 Hausdorff and packing dimensions of the range and graph	163
7 Hausdorff dimension of the level sets and hitting probabilities	176
8 Local times and their joint continuity	187
References	200
