

Math 1090
Test 3 Review

Test three covers material we learned in chapters 4 and 5. This review sheet should help you focus your studying for the test. It is not expected that you solve all of the problems here, but you should at least read the questions to get an idea of what kind of questions will be on the test. The test will be comprised of problems very similar to the ones on this review sheet.

To review for the test, start with looking at all of the homework that was assigned, especially out of sections 4.3 and 5.3.

To practice for the test do the following:

Section 4.1: 19, 41

Section 4.2: 17, 25, 32

Section 4.3: 23, 35, 37, 43

Section 5.2: 25-26, 29, 33, 41

Section 5.3: Work as many odd numbered problems as you can.
