

Important Note about HW 2 Grades

I had the grader grade 17 of the problems from the homework with each worth three points. Then I asked him to give 9 points for completeness, that is if a student only completed 50% of the assignment, that student should only get 50% of the 9 points, but it seems the grader did not understand that bit of information. So if you feel you had incomplete points unfairly assigned, please email me and *honestly* tell me how many of those points you missed you should receive. So, an example of a good email response to me would be:

Erin,

I received 45/60 points on my second homework assignment. 9 of the points I missed were because the grader said my assignment was incomplete, but I did all of the problems except for #9, #22, and all the parts of #19. Therefore, I did about 90% of the assignment, so I should have only missed 1 of the 9 points for completeness. Please record my score as 53/60.

Thanks,
Student

I hope this problem doesn't persist, and I am sorry for the inconvenience.
