This volume provides mathematically rich and pragmatically enlightening discussions on blackjack, poker, baccarat, roulette, video poker, backgammon, racing, and sports betting. Other discussions touch upon the Kelly criterion, proportional betting, Parrondo's principle, poker bots, and rebates on losses. The analyses presented herein often use mathematical tools and computational strategies that have evolved only in recent years.

OPTIMAL PLAY
MATHEMATICAL STUDIES OF GAMES AND GAMBLING
Stewart N. Ethier & William R. Eadington, editors

$59.95
