Comments on course effectiveness

The lectures were excellent, and my notes from class are very useful for me. The projects were helpful for putting the theory into practice

The projects were especially helpful for learning the material and they required applications of the material.

Class notes and professor interest to help students.

Instructor Comments

Possibly set the standard for homeworks, and projects at the beginning of course. After first few lectures I was scared out of my mind because the amount of proofs you do within an average lecture, and thought that same rigor would be expected on the assignments. Other than that wonderful teaching and great course.

It was nice to have the recap at the beginning of class that helped us get back into the topic, and the many examples of analyzing specific models was very helpful

The instructor is knowledge in the material and he was able to explain the material in multiple ways. The class environment was friendly and encouraging.

Eager and available to help students with questions. He could be more organized in the board.
