List two things about the course content, materials or design that were effective for your learning, or make constructive suggestions for improvement.

- His lecture is self-explanatory, which is convenient for us to pick up.
- Class notes Matlab code
- You did a very good job making sure that we took away the big picture and important theorems from this course. You also did a good job telling us what is still unknown, and telling what techniques are being used to advance the field.

RASSOUL-AGHA,FIRAS: List two things about this instructor that were effective for your learning, or make constructive suggestions for improvement.

- Sometimes he tells us his own techniques in calculating or understanding something. That is really helpful. His lecture is interesting. But he went too fast sometime.
