Calculus I
Math 1210-002 - Fall 2015
JWB 335 9:40-10:30 am

Instructor:
Henryk Hecht     JWB 329
Office Hours: Mon,Wed 8:30-9:30 am, in JWB 329

Email: hecht@math.utah.edu

Course Web Page: http://www.math.utah.edu/~hecht/1210/

Grading:
There will be 12 quizzes, and a two-hour final exam. I will drop the lowest 4 of your quiz scores.
There will be two methods of computing the final grade. I will automatically apply the result of better outcome.

Method 1.
The remaining 8 quizzes will determine 70% of your grade. The final exam will determine 30% of your grade.

Method 2.
The remaining 8 quizzes will determine 40% of your grade. The final exam will determine 60% of your grade.

In addition, you may earn up to 10% extra credit on the optional webwork assignments.

Each quiz will be usually (but not always) on the material covered during the previous three class meetings. The day of the quiz will be also devoted to a review, unless the quiz will take up the whole class period.

To get a good grade:
There is a simple strategy for doing well in this course: Before each class meeting, read the section to be discussed in that meeting and do the homework problems assigned for that section. Then come to class prepared to ask questions about that section and those problems. This will prepare you to do well on the quizzes, since the quiz problems will be just like homework problems and sometimes will be taken directly from the homework.
No calculators will be allowed on quizzes and tests. Phones and other electronic equipment have to be turned off during the class meetings. Cheating incidents during quizzes or final exam will result in zero credit for the quiz (final). They may also result in a disciplinary action against the students involved.
