**Course Contents:** We will cover chapters 6-10 and 15 from the book. The weekly course schedule with homework assignments is posted on the course webpage (available from my homepage) and will be updated as needed.

**Time Requirements:** Students need to study about two hours outside of class for every hour of lecture. More time may be required depending on your level of preparation.

**Assignments:** Each Tuesday, homework assigned for the previous week will be due by the end of the day. Homework can be turned in during class or under the door of my office so long as it is there before I arrive on Wednesday morning. Late homework will not be accepted without my prior consent. I will drop your four lowest assignment scores to calculate your homework grade. Problems should be clearly labeled and in order. Solutions should contain enough detail for one of your classmates to understand what you have done. While you are permitted to use calculators on the homework, be aware that you will not be able to use calculators on the exams. You are strongly encouraged to study and work together on homework assignments and to get help from the tutoring center as needed. ([www.math.utah.edu/ugrad/tutoring.html](http://www.math.utah.edu/ugrad/tutoring.html)) However, you each must submit your own assignments. It is extremely important that you completely and thoroughly understand all the homework problems in order to be adequately prepared for the exams.
