

1. Describe the overall interaction of your group by listing who wrote which portions of the code, who wrote which portions of the paper, who developed the presentation, who attended group meetings, etc. Be as specific as you can.

2. Use this space or another sheet to tell me any other pertinent information about the project and the group dynamics. This is the place to tell me that the group contributed equally but in different ways, that one person dominated the group and would not allow collaboration, that one person did not participate, etc.

3. Use the following scale to numerically rank your group members performance during the project.

0 – no contribution

1 – occasional contribution

2 – consistent, but minimal contribution

3 – consistent worthwhile contribution

4 – consistent exemplary contribution

5 – independent contribution (completed without group assistance)

	Your Name	Group Member 2	Group Member 3	Group Member 4
Task				
1. Software Package				
a. Algorithm Development				
b. Coding				
c. Testing				
2. Paper				
a. Background				
b. Algorithm/Mathematics				
c. Error Analysis				
d. Testing/Performance Comparisons				
e. Users Guide				
3. Presentation				
a. Content				
b. Visual Aides				
c. Practice				
4. Overall Project/Additional Items				
a. Ideas/Suggestions				
b. Proofreading/Typing				
c. Team Player
