

Math4020, Polygons Worksheet

1. Which of the following figures are NOT quadrilaterals? Explain why.

a.

b.

c.

d.

2. Give as many (mathematically precise) names as possible for the figures:

a.

b.

c.

3. How many rectangles are in this figure?

4. Draw how you would divide this rectangle (not a square) into four congruent right triangles.

5. On a sheet of isometric graph paper (i.e. equilateral triangle graph paper), draw the following shapes, if possible. Some will not be possible!

- (a) isosceles (but not equilateral) triangle
- (b) square
- (c) rectangle that is not a square
- (d) rhombus that is not a square
- (e) parallelogram that is not a rhombus
- (f) right triangle
- (g) isosceles right triangle
- (h) trapezoid

Here is a sample of such graph paper.

6.

Classifying Triangles (A)

Classify each triangle using its side and angle properties.
