8.2 Ellepses

Ingredients: two points (foin) and a distance
Defre of Ellipse: The set of all points in a plane such that for each pt on the ellipse, the sum of its distances from the two fixed pts (called fri) is constant.
ExI Given the pts $F_{1}(-4,0)$ and $F_{2}(4,0)$ (the two foin) and a constant distance of 12 , draw the ellipse that these determine.
