Math2210 Final Review Problems
Kelly MacArthur

From your book:
Chapter 14 Review Sample Test Problems (pg 774)
#1, 2, 4-14 all

(Also, you can redo all the midterm review problems assigned previously.)

From the “Final Review Extra Problems”:
(These problems are from a different calculus book.)
Exercises pg 646-647 #1, 2, 3, 20, 21
Exercises pg 714-716 #1-13 all, 17-27 odd, 28-36 all, 39-45 all, 51-60 all
Exercises pg 752-753 #1, 2, 5, 7
Exercises pg 818-819 #1-11 odd, 15, 16, 17-21 all, 23, 24, 27, 28, 31, 32
Exercises pg 882-883 #1-14 all, 19, 23, 24, 30

The test covers everything we’ve covered in this class. Probably about 40-50% of the final exam will be comprised of questions from chapters 13 and 14, since most of chapter 13 and all of chapter 14 hasn’t yet been tested. The rest of the exam will focus on the other stuff.

You can bring two 8.5 x 11 inch papers with notes (on both sides, if you want) to use as a reference.

No calculator is necessary nor allowed for this exam.
