

Math3105

Homework 9

Due next week in class

Homework Assigned:

1. **This MUST be typed.** Prepare a lesson (to teach in class). You can choose to teach any activity using pi, trigonometry or fractals. You will need to turn in your (brief) lesson plan. You should prepare at least two to three different lessons so we don't have overlap between presentations. Your teaching will last about 5 minutes.
2. Go to <http://www.facade.com/legacy/amiinpi/> , find out where your birthday is in the pi digits, and write that down (or just print out the page result).
3. Have an awesome spring break!

Reminders: (1) Bring a compass and straightedge to class after spring break. (2) Start reading Flatland over spring break.
