TWO SERIES OF SQUARE 1-DESIGNS DERIVED FROM CLASSICAL DESIGNS $PG(2, p^{2s})$ AND $PG_2(3, p^s)$

by

Vlado Cigić, Mostar, BiH

*Abstract.*In this paper there are discussed two families of 1-designs derived from classical designs $PG(2, p^{2s})$ and $PG_2(3, p^s)$. In the first case we have a series of semisymmetric designs with a divisibility.
Mathematics subject classification: 05B25.
Keywords: Partial and semi-symmetric design divisibility, resolution, Baer subdesign.
