Introductions
- Peter Alfeld, pa@math.utah.edu
- Liz Cowgill, liz.cowgill@utah.edu
- Scott Pasquale, scottpasqualela@gmail.com

Sections 3, 7, and 90 are merged in Canvas and called 1220-3. But if you signed up for section 90 you are still in that section. It won’t matter for any practical purposes.

Zoom, Meeting online

We’ll meet MTWF 9:40-10:30 on Zoom. Let’s refer to these meetings as lectures. You can get to the zoom session through Canvas. Click on Class Meetings and then click on the relevant link in the weekly calendar you will see.

Most days (starting this Friday) I will complete partial notes. You can look at the partial notes before class, and I’ll post the completed version online after class. You can watch recordings of the lectures on Canvas.

On MWF Liz will monitor the Chat Channel and help you with questions.

You are also welcome to ask me questions during the lecture. Just unmute your microphone and say “Question”.
• I am planning to stay after each of the lectures and answer questions about the subject and the home work. You can think of these after lecture sessions as my office hours. I’ll stay as long as necessary (within reason).

• The three of us are also available for private Zoom meetings. Email any of us, and we’ll set a time.

• The lectures will be recorded and the recordings will be available on Canvas.

• In addition, Liz and Scott will run a total of 9 weekly zoom based discussion sessions (DSs) where you can ask questions and discuss the subject with Liz or Scott, and your class mates. The schedule for those DSs will be based on the response to the poll that’s running this week.

• We do have DSs this week, according to the following preliminary schedule:
  – Monday: 3:05, 4:10
  – Tuesday: 3:05
  – Wednesday: 2:00, 3:05
  – Thursday: 3:05, 4:10
  – Friday: 2:00, 5:15

• You can get to the DSs the same way you’ll get to the lectures.

• We believe you will find those DSs extremely useful and enjoyable, particularly in the cur-
rent climate of social distancing. You’ll learn the subject more effectively and thoroughly, and you’ll get to know your class mates. We encourage you to attend as many DSs as you can.

• However, you will also get credit for attending those sessions. Each one you attend will count for 1/3 of one percentage point towards your final grade, up to a maximum total of 10%. To get full credit for the DSs you’ll need to attend a total of at least 30 DSs, or about 2 DSs a week. You can get credit for more than one session per day.

• Nobody is required to attend the lectures. However, if you are signed up for 1220-3 or 1220-7 I presume you like to attend an ordinary class and expect that you will actually attend those sessions. If you are signed up for Math 1220-90 you are cordially invited to attend the lectures. I don’t keep attendance during the class meetings. The lectures will be recorded and available for you to view on Canvas. The Discussion sessions will not be recorded.

• Zoom Etiquette:
  – Mute your microphone unless you are speaking.
  – I invite you to keep your camera on. This will make our meetings more interactive and enjoyable, and more “real”. However, you are of course welcome to keep your
camera off for whatever reason.

- Public conversations (and private ones as well) in the Chat Channel should be polite and respectful. No derogatory comments, name calling, bullying, sarcasm, politics, or religion.

- Liz, Scott, and I will use distinct zoom links for our meetings, but we plan to keep them the same throughout the semester, so you can bookmark them. If any of them get changed for some reason you can always go to the relevant meeting through Canvas.

- Liz Cowgill will tell you now about Learning Assistants and what they do.

- Go over the Syllabus.

- Demonstrate WeBWorK.
