Engineering Math E-Textbook for Calculus

There are several options to acquire both e-book and paper versions of the text:

(A) **The Inclusive Access Program:** The e-textbook will be accessed/viewed within the Canvas course page and so viewing it requires internet access. The price will vary depending on semester, but it is currently $40.00 per semester, which competitive with other e-book rental options, with the added convenience that it is present in Canvas.

An email will go out to all Math 1310, 1311, 1320, 1321, 2310, and 3140 students prior to the first day of class with information on what Inclusive Access is and instructions on how to access their digital course materials. If the student decides they don’t want the instant access to the course materials they will have the option to OPT OUT and will be refunded accordingly. Students still need to pay for the course materials cost along with their tuition, but once they OPT OUT during the first two weeks of class they will receive a full refund of the course material (i.e., the e-textbook) cost. They will then be responsible for obtaining their own course material/textbook for that course. If students chooses to OPT IN to Inclusive Access as their sole source for the textbook, it is the student’s responsibility to ensure their online access to the textbook in order to complete any assignments on time—saying your dog ate your wireless router is not a valid excuse.

For more information: [http://www.campusstore.utah.edu/inclusiveaccess/](http://www.campusstore.utah.edu/inclusiveaccess/)

If students cannot find the email, they can go to the website [https://portal.verba.io/utah/login](https://portal.verba.io/utah/login) and login to change their inclusive access IN/OUT status.

(B) **A special order at the U of Utah Bookstore:** If students want/need a paper hardcopy purchased via the bookstore.

(C) **Any online retailer:** For paper copy and e-books, for both purchase and rental, some examples are amazon.com, chegg.com, campusbookrentals.com (a local Utah company).
