Generally, I will not be on campus before 9:00 a.m. I would, of course, be happy to make an appointment for those unseemly hours, though woe betides the student who arranges such a meeting and fails to show up!

If you would like to meet with me in the afternoon, it may be in your best interest to make an appointment. My presence in the office after I've finished classes is subject to the vagaries of my workload.
