

Friends Don't Let Friends Drive SUVs

Would you let one of your friends walk into a party with a large piece of spinach stuck between his front teeth? No, of course not! For similar reasons, we at critical mass are telling you to stop driving that Suburban assaUlt Vehicle. Why? Because they're horrible gas-guzzlers; because they're rather unsafe; because when was the last time you took that thing off-roading? And because they smell bad. So get out of that stinky SUV, get on a bicycle and join us! There's no need to thank us; after all, that's what friends are for.
