

MATH 1260-2, MTWF 8:35 - 9:25 IN NS 203

1. INSTRUCTOR

Gordan Savin

<http://www.math.utah.edu/~savin>

Office hours (LCB 205): MTWH 11AM - 12PM.

2. SYLLABUS

The goal of this course is to cover (parts of) *Calculus III*, 2nd edition, by Marsden and Weinstein. Note that reading the book cannot replace attending the lectures. Regular attendance is essential to do well in this class.

There will be five in-class exams, each worth 50 points. The lowest score exam will be dropped. I will give NO make-up exams. Each exam will be preceded by a sample exam, which should give you a very good idea about the topics and types of problems appearing on the exam.

The Final exam will be given in NS 203 on Thursday, May 06, from 8:00 - 10:00. This exam is cumulative and will be worth 100 points.

3. TUTORING

For details see www.math.utah.edu/ugrad/mathcenter.html
