

# Complex Variables

Joseph L. Taylor

Version 2.2, Fall 2009

# Contents

<b>1</b>	<b>The Complex Numbers</b>	<b>1</b>
1.1	Definition and Simple Properties . . . . .	1
1.2	Convergence in $\mathbb{C}$ . . . . .	9
1.3	The Exponential Function . . . . .	16
1.4	Polar Form for Complex Numbers . . . . .	21
<b>2</b>	<b>Analytic Functions</b>	<b>29</b>
2.1	Continuous Functions . . . . .	29
2.2	The Complex Derivative . . . . .	37
2.3	Contour Integrals . . . . .	44
2.4	Properties of Contour Integrals . . . . .	51
2.5	Cauchy's Theorem for a Triangle . . . . .	58
2.6	Cauchy's Theorem for a Convex Set . . . . .	66
2.7	Properties of the Index Function . . . . .	72
<b>3</b>	<b>Power Series Expansions</b>	<b>81</b>
3.1	Uniform Convergence . . . . .	81
3.2	Power Series Expansions . . . . .	88
3.3	Liouville's Theorem . . . . .	96
3.4	Zeros and Singularities . . . . .	103
3.5	The Maximum Modulus Principle . . . . .	111
<b>4</b>	<b>The General Cauchy Theorems</b>	<b>117</b>
4.1	Chains and Cycles . . . . .	118
4.2	Cauchy's Theorems . . . . .	125
4.3	Laurent Series . . . . .	133
4.4	The Residue Theorem . . . . .	139
4.5	Rouché's Theorem and Inverse Functions . . . . .	146
4.6	Homotopy . . . . .	151
<b>5</b>	<b>Residue Theory</b>	<b>163</b>
5.1	Computing Residues . . . . .	163
5.2	Evaluating Integrals Using Residues . . . . .	169
5.3	Fourier and Mellin Transforms . . . . .	178

5.4	Summing Infinite Series . . . . .	187
<b>6</b>	<b>Conformal Mappings</b>	<b>193</b>
6.1	Definition and Examples . . . . .	193
6.2	The Riemann Sphere . . . . .	199
6.3	Linear Fractional Transformations . . . . .	205
6.4	The Riemann Mapping Theorem . . . . .	211
6.5	The Poisson Integral . . . . .	216
6.6	The Dirichlet Problem . . . . .	223
<b>7</b>	<b>Analytic Continuation</b>	<b>231</b>
7.1	The Schwarz Reflection Principle . . . . .	231
7.2	Continuation Along a Curve . . . . .	237
7.3	Analytic Covering Maps . . . . .	243
7.4	The Picard Theorems . . . . .	247
<b>8</b>	<b>Infinite Products</b>	<b>255</b>
8.1	Convergence of Infinite Products . . . . .	255
8.2	Weierstrass Products . . . . .	261
8.3	Entire Functions of Finite Order . . . . .	269
8.4	Hadamard's Factorization Theorem . . . . .	274
<b>9</b>	<b>The Gamma and Zeta Functions</b>	<b>281</b>
9.1	Euler's Gamma Function . . . . .	282
9.2	The Riemann Zeta Function . . . . .	288
9.3	Properties of $\zeta$ . . . . .	295
9.4	The Riemann Hypothesis and Prime Numbers . . . . .	301
9.5	A Proof of the Prime Number Theorem . . . . .	306
<b>A</b>	<b>Solutions to Selected Exercises</b>	<b>311</b>
	Chapter 1 . . . . .	311
