

# Foundations of Analysis

Joseph L. Taylor

Version 2.2, Fall 2009

# Contents

<b>1</b>	<b>The Real Numbers</b>	<b>1</b>
1.1	Sets and Functions . . . . .	2
	Sets . . . . .	2
	Functions . . . . .	5
	Exercise Set 1.1 . . . . .	7
1.2	The Natural Numbers . . . . .	8
	Induction . . . . .	9
	Inductive Definitions . . . . .	10
	Binomial Formula . . . . .	11
	Using Peano's Axioms to Develop Properties of $\mathbb{N}$ . . . . .	12
	Exercise Set 1.2 . . . . .	14
1.3	Integers and Rational Numbers . . . . .	15
	The Commutative Ring of Integers . . . . .	16
	The Field of Rational Numbers . . . . .	17
	The Ordered Field of Rational Numbers . . . . .	18
	Defects of the Rational Field . . . . .	19
	Exercise Set 1.3 . . . . .	20
1.4	The Real Numbers . . . . .	21
	Dedekind Cuts . . . . .	22
	The Completeness Axiom . . . . .	24
	The Archimedean Property . . . . .	25
	Exercise Set 1.4 . . . . .	26
1.5	Sup and Inf . . . . .	27
	Greatest Lower Bound . . . . .	28
	The Extended Real Numbers . . . . .	28
	Sup and Inf . . . . .	28
	Properties of Sup and Inf . . . . .	31
	Sup and Inf for Functions . . . . .	32
	Exercise Set 1.5 . . . . .	33
<b>2</b>	<b>Sequences</b>	<b>35</b>
2.1	Limits of Sequences . . . . .	35
	Distance and Absolute Value . . . . .	35
	Sequences . . . . .	37

	Limits of Sequences . . . . .	38
	Exercise Set 2.1 . . . . .	40
2.2	Using the Definition of Limit . . . . .	41
	Using Identities and Inequalities . . . . .	41
	Using Information About a Limit . . . . .	42
	An Equivalent Definition of Limit . . . . .	43
	Negating the Limit Definition . . . . .	44
	Exercise Set 2.2 . . . . .	44
2.3	Limit Theorems . . . . .	45
	The Main Limit Theorem . . . . .	47
	Exercise Set 2.3 . . . . .	48
2.4	Monotone Sequences . . . . .	49
	Convergence of Monotone Sequences . . . . .	49
	Infinite Limits . . . . .	51
	Exercise Set 2.4 . . . . .	53
2.5	Cauchy Sequences . . . . .	54
	Nested Intervals . . . . .	54
	The Bolzano-Weierstrass Theorem . . . . .	55
	Cauchy Sequences . . . . .	57
	Exercise Set 2.5 . . . . .	58
2.6	$\liminf$ and $\limsup$ . . . . .	59
	Subsequential Limits . . . . .	61
	A Criterion for Convergence . . . . .	62
	Exercise Set 2.6 . . . . .	62
<b>3</b>	<b>Continuous Functions</b> . . . . .	<b>65</b>
3.1	Continuity . . . . .	65
	Continuity . . . . .	66
	An Alternate Characterization of Continuity . . . . .	67
	Combinations of Continuous Functions . . . . .	69
	Composition of Continuous Functions . . . . .	69
	Exercise Set 3.1 . . . . .	70
3.2	Properties of Continuous Functions . . . . .	71
	Maximum and Minimum Values . . . . .	71
	Intermediate Value Theorem . . . . .	73
	Image of an Interval . . . . .	74
	Inverse Functions . . . . .	74
	Exercise Set 3.2 . . . . .	75
3.3	Uniform Continuity . . . . .	76
	Conditions Ensuring Uniform Continuity . . . . .	77
	Consequences of Uniform Continuity . . . . .	78
	Exercise Set 3.3 . . . . .	80
3.4	Uniform Convergence . . . . .	80
	Sequences of Functions . . . . .	81
	Uniform Convergence . . . . .	81
	Uniform Convergence and Continuity . . . . .	83

	Tests For Uniform Convergence . . . . .	84
	Uniformly Cauchy Sequences . . . . .	84
	Exercise Set 3.4 . . . . .	85
<b>4</b>	<b>The Derivative</b>	<b>87</b>
4.1	Limits of Functions . . . . .	87
	One Sided Limits, Limits at $\pm\infty$ . . . . .	88
	Limit Theorems . . . . .	90
	Infinite Limits . . . . .	91
	Exercise Set 4.1 . . . . .	92
4.2	The Derivative . . . . .	93
	Differentiation Theorems . . . . .	94
	The Chain Rule . . . . .	95
	Derivative of an Inverse Function . . . . .	96
	Exercise Set 4.2 . . . . .	97
4.3	The Mean Value Theorem . . . . .	98
	Critical Points . . . . .	98
	The Mean Value Theorem . . . . .	99
	Functions with Vanishing Derivative . . . . .	100
	Monotone Functions . . . . .	100
	Uniform Continuity . . . . .	101
	Exercise Set 4.3 . . . . .	102
4.4	L'Hôpital's Rule . . . . .	103
	Cauchy's Mean Value Theorem . . . . .	103
	L'Hôpital's Rule . . . . .	104
	Exercise Set 4.4 . . . . .	107
<b>5</b>	<b>The Integral</b>	<b>109</b>
5.1	Definition of the Integral . . . . .	109
	Upper and Lower Sums . . . . .	110
	Refinement of Partitions . . . . .	111
	The Integral . . . . .	112
	Exercise Set 5.1 . . . . .	115
5.2	Existence and Properties of the Integral . . . . .	116
	Existence Theorems . . . . .	116
	Linearity of the Integral . . . . .	117
	The Order Preserving Property . . . . .	119
	Interval Additivity . . . . .	121
	Theorem of the Mean for Integrals . . . . .	122
	Exercise Set 5.2 . . . . .	122
5.3	The Fundamental Theorems of Calculus . . . . .	123
	First Fundamental Theorem . . . . .	123
	Second Fundamental Theorem . . . . .	125
	Substitution . . . . .	127
	Integration by Parts . . . . .	127
	Exercise Set 5.3 . . . . .	128

5.4	Logs, Exponentials, Improper Integrals . . . . .	130
	The Natural Logarithm . . . . .	130
	The Exponential Function . . . . .	131
	The General Logarithm . . . . .	133
	Improper Integrals . . . . .	133
	Functions With Singularities . . . . .	134
	Exercise Set 5.4 . . . . .	136
<b>6</b>	<b>Infinite Series</b>	<b>139</b>
6.1	Convergence of Infinite Series . . . . .	139
	Geometric Series . . . . .	141
	Series with Non-Negative Terms . . . . .	142
	Comparison Test . . . . .	142
	Exercise Set 6.1 . . . . .	144
6.2	Tests for Convergence . . . . .	145
	Integral Test . . . . .	145
	Root Test . . . . .	147
	Ratio Test . . . . .	148
	Exercise Set 6.2 . . . . .	150
6.3	Absolute and Conditional Convergence . . . . .	151
	Alternating Series . . . . .	151
	Absolute versus Conditional Convergence . . . . .	152
	Products of Series . . . . .	155
	Exercise Set 6.3 . . . . .	156
6.4	Power Series . . . . .	158
	Series of Functions . . . . .	158
	Weierstrass M-test . . . . .	159
	Power Series . . . . .	160
	Integration of Power Series . . . . .	162
	Differentiation of Power Series . . . . .	163
	Exercise Set 6.4 . . . . .	164
6.5	Taylor's Formula . . . . .	165
	Power Series Coefficients . . . . .	166
	Taylor's Formula . . . . .	166
	Lagrange's Form for the Remainder . . . . .	169
	Exercise Set 6.5 . . . . .	171
<b>7</b>	<b>Convergence in Euclidean Space</b>	<b>173</b>
7.1	Euclidean Space . . . . .	173
	The Vector Space $\mathbb{R}^d$ . . . . .	174
	Inner Product . . . . .	175
	Components of a Vector . . . . .	176
	Norm and Distance . . . . .	177
	The Triangle Inequality . . . . .	178
	Norms in General . . . . .	178
	The Normed Vector Space $C(I)$ . . . . .	179

	Exercise set 7.1 . . . . .	180
7.2	Convergent Sequences of Vectors . . . . .	181
	Metric Spaces . . . . .	181
	Sequences . . . . .	182
	Limit Theorems . . . . .	183
	The Bolzano-Weierstrass Theorem . . . . .	185
	Cauchy Sequences . . . . .	185
	Exercise Set 7.2 . . . . .	186
7.3	Open and Closed Sets . . . . .	187
	Interior, Closure, and Boundary . . . . .	190
	Sequences . . . . .	191
	Exercise Set 7.3 . . . . .	192
7.4	Compact Sets . . . . .	193
	Open Covers . . . . .	193
	Compactness . . . . .	193
	The Heine-Borel Theorem . . . . .	194
	Applications of Compactness . . . . .	196
	Compact Metric Spaces . . . . .	197
	Exercise Set 7.4 . . . . .	197
7.5	Connected Sets . . . . .	198
	Connected Subsets of $\mathbb{R}$ . . . . .	199
	Connected Components . . . . .	200
	Components of an Open Set . . . . .	201
	Exercise Set 7.5 . . . . .	203
<b>8</b>	<b>Functions on Euclidean Space</b>	<b>205</b>
8.1	Continuous Functions of Several Variables . . . . .	205
	Vector Valued Functions . . . . .	206
	Sequences and Continuity . . . . .	207
	Composition of Functions . . . . .	207
	Limits . . . . .	208
	Curves and Surfaces . . . . .	209
	Exercise Set 8.1 . . . . .	210
8.2	Properties of Continuous Functions . . . . .	211
	Continuity and Open and Closed Sets . . . . .	211
	Continuity and Compactness . . . . .	212
	Continuity and Connectedness . . . . .	214
	Uniform Continuity . . . . .	215
	Exercise Set 8.2 . . . . .	216
8.3	Sequences of Functions . . . . .	218
	Uniform convergence . . . . .	218
	Uniform Convergence and Continuity . . . . .	219
	Uniformly Cauchy Sequences . . . . .	220
	The Sup Norm . . . . .	220
	Series of Functions . . . . .	221
	Exercise Set 8.3 . . . . .	222

8.4	Linear Functions, Matrices . . . . .	223
	Linear Functions . . . . .	224
	Linear Functions and Matrices . . . . .	225
	Matrix Operations . . . . .	227
	Norm of a Linear Transformation . . . . .	228
	Inverse of a Matrix . . . . .	230
	Exercise Set 8.4 . . . . .	231
8.5	Dimension, Rank, Lines, and Planes . . . . .	232
	Affine Functions . . . . .	234
	Lines in $\mathbb{R}^3$ . . . . .	235
	Planes in $\mathbb{R}^3$ . . . . .	237
	Exercise Set 8.5 . . . . .	238
<b>9</b>	<b>Differentiation in Several Variables</b>	<b>241</b>
9.1	Partial Derivatives . . . . .	241
	The Partial Derivatives as Limits . . . . .	242
	Higher Order Partial Derivatives . . . . .	243
	Equality of Mixed Partial . . . . .	244
	Exercise Set 9.1 . . . . .	247
9.2	The Differential . . . . .	248
	Affine Approximation in Several Variables . . . . .	249
	The Differential Matrix . . . . .	250
	A Condition for Differentiability . . . . .	252
	A Function Which is not Differentiable . . . . .	254
	Exercise Set 9.2 . . . . .	254
9.3	The Chain Rule . . . . .	255
	An Equivalent Formulation of Differentiability . . . . .	256
	The Chain Rule . . . . .	257
	Differential of an Inner Product . . . . .	259
	Dependent Variable Notation . . . . .	260
	A Change of Variables . . . . .	261
	Exercise Set 9.3 . . . . .	261
9.4	Applications of the Chain Rule . . . . .	263
	The Gradient . . . . .	263
	Directional Derivatives . . . . .	264
	The Derivative of a Curve . . . . .	265
	Higher Dimensional Tangent spaces . . . . .	266
	Level Sets . . . . .	268
	Exercise Set 9.4 . . . . .	270
9.5	Taylor's Formula . . . . .	271
	The Formula . . . . .	272
	The Mean Value Theorem . . . . .	274
	Max and Min . . . . .	275
	Max/Min for Functions of 2 Variables . . . . .	277
	Lagrange Multipliers . . . . .	279
	Exercise Set 9.5 . . . . .	281

9.6	The Inverse Function Theorem . . . . .	282
	One to One . . . . .	282
	Open Mapping Theorem . . . . .	284
	The Inverse Function and its Differential . . . . .	285
	The Inverse Function Theorem . . . . .	286
	Exercise Set 9.6 . . . . .	287
9.7	The Implicit Function Theorem . . . . .	288
	Local Systems of Coordinates . . . . .	288
	Parameterizing a Curve . . . . .	289
	The Implicit Function Theorem . . . . .	291
	Exercise Set 9.7 . . . . .	294
<b>10</b>	<b>Integration in Several Variables</b>	<b>297</b>
10.1	Integration over a Rectangle . . . . .	297
	Upper and Lower Sums . . . . .	298
	Refinement . . . . .	300
	Upper and Lower Integrals . . . . .	300
	The Integral . . . . .	301
	Properties of the Integral . . . . .	302
	A Simple Example . . . . .	303
	Exercise Set 10.1 . . . . .	304
10.2	Jordan Regions . . . . .	305
	Properties of Volume . . . . .	307
	Sets of Volume Zero . . . . .	308
	A Characterization of Jordan Regions . . . . .	309
	Exercise Set 10.2 . . . . .	310
10.3	The Integral over a Jordan Region . . . . .	311
	An Existence Theorem . . . . .	311
	The Integral over a Jordan Region . . . . .	312
	Existence of the Integral over a Jordan Region . . . . .	313
	Properties of the Integral . . . . .	313
	Integral of a Sequence . . . . .	314
	Exercise Set 10.3 . . . . .	316
10.4	Iterated Integrals . . . . .	318
	An Additivity Lemma . . . . .	318
	Fubini's Theorem . . . . .	318
	Iterated Integrals over Non-rectangular Regions . . . . .	321
	Exercise Set 10.4 . . . . .	325
10.5	The Change of Variables Formula . . . . .	326
	Factorization of Matrices . . . . .	327
	Linear Transformations and Volume . . . . .	328
	Smooth Image of a Rectangle . . . . .	330
	Integral over the Smooth Image of a Rectangle . . . . .	331
	Integral over the Smooth Image of a Jordan Region . . . . .	335
	Exercise Set 10.5 . . . . .	338

<b>11 Vector Calculus</b>	<b>341</b>
11.1 1-Forms and Path Integrals	341
Smooth Curves	341
Piecewise Smooth Curves – Paths	342
Closed Paths	343
Length of a Path	343
Differential 1-Forms	344
Integration Along a Path	344
The Fundamental Theorem of Calculus	346
Simple Paths and Smooth Simple Paths	346
Exercise Set 11.1	347
11.2 Change of Variables	348
Parameter Independence	348
Arc Length Parameterization	351
Classical Form for Path Integrals	352
Change of Variables for 1-Forms	353
Change of Variables in Path Integrals	355
Exercise Set 11.2	356
11.3 Differential Forms of Higher Order	357
2-Forms	357
3-Forms	359
Transformation Laws for 2-Forms and 3-Forms	361
Exercise Set 11.3	364
11.4 Green’s Theorem	364
Green’s Theorem on a Rectangle	365
Integration of 2-Forms in the Plane	366
Change of Variables for Integrals of 2-forms	366
2-Cells	367
Orientation for Paths	369
Integration Over a Cell	370
Integration Over a Simple Cell	370
Change of Parameter	370
Green’s Theorem on a Cell	371
Classical Version of Green’s Theorem	373
Exercise Set 11.4	374
11.5 Surface Integrals and Stokes’s Theorem	375
Integration Over a Parameterized Surface	376
Parameter Independence	377
Orientation	378
Surfaces and Orientation	379
Surfaces in 3-Space	380
Surface Integrals in 3-Space	381
Surface Area	381
Integration over a 2-Cell in $\mathbb{R}^d$	382
Stokes’ Theorem	383
Classical Form of Stokes’s Theorem	384

Exercise Set 11.5 . . . . .	385
11.6 Gauss's Theorem . . . . .	386
The Integral of a 3-Form . . . . .	387
The Boundary of a Cube . . . . .	388
Gauss's Theorem on a Cube . . . . .	389
Gauss's Theorem for a 3-Cell . . . . .	389
Classical Form of Gauss's Theorem . . . . .	392
The Integral over a 3-Surface in $\mathbb{R}^d$ . . . . .	392
Stokes's Theorem for 3-Cells in $\mathbb{R}^d$ . . . . .	393
Exercise Set 11.6 . . . . .	393
11.7 Chains and Cycles . . . . .	395
1-Chains . . . . .	395
1-Cycles . . . . .	396
p-Chains and p-Cycles . . . . .	399
Boundaries . . . . .	400
Integration Over Chains and Cycles . . . . .	401
The General Stokes Theorem . . . . .	402
Exercise Set 11.7 . . . . .	403
