University of Utah
Course and Instructor Evaluation Written Comments Report
Summer 2007

College/School:	College of Science	Print Date:	24-Aug-07
Instructor:	HORVATH,ZSUZSANNA;		
Subject:	Mathematics	Course #:	1070 - 001
		Enrollment:	36
Course:	Intro Stat Inference	Evaluations processed:	29

List two things about the course content, materials or design that were effective for your learning, or make constructive suggestions for improvement.

- It was easy to follow and really organized!
- get a new book. this one is hard to read and understand. Today text books are a lot better than this. this reminds me of those text books that is really good for one thing. Reading when you cannot sleep, because it will put you to sleep and you will have no idea what you read.
- She was very organized and stayed right on track in the class. The homework assignments were extremely helpful and the exam questions actually reflected what we did in class, it was a nice break from the instructors who try to trick you!
- She did a lot of examples on the board and made sure we understood the steps to solving a statistical problem.
- Our teacher was very helpful in the understanding of the concepts
- The formulas were occasionally difficult to remember, but otherwise statistics is rather fun! The text was easy to follow...
- I liked how she did very many examples written out on the board and I loved how the examples she used were somewhat similar to those on the assignments.
- The instructor was very efficient in her lectures. She was always on time and had her materials organized
- zhorvath was very informative she went over every aspect of a formula the homework was a great help and that she reviewed the questions in class
- Could have had a better book.

- Ms. Horvath has a natural knack for teaching - encouraged participation and gave helpful study advice. I liked the examples used to explain concepts and the organized way our lectures were conducted.

HORVATH,ZSUZSANNA: List two things about this instructor that were effective for your learning, or make constructive suggestions for improvement.

- She is an excellent instructor, there is no question about what she is going to test you on and she welcomes questions and participation. I wish all my instructors were as upfront and open.
- She gave us time to ask questions. And she included the class in the lecture.
- She did great reviews before each exam which helped with the exams. Also, she always was willing and available to work with the students.
- The one thing that I didn't like about the instructor and felt could be improved on was her interaction with the classroom while she is instructing. She hardly looked at the class and at students while they spoke. She just looked at the board most of the time. Like she was shy or embarrassed to be in front of the classroom.
- Ms. Horvath was professional and consistent. She was able to bring the concepts of statistics to life and made learning this subject interesting. I was initially worried about the lag time for getting graded homework back before a test but it wasn't a detriment in the end.
- Same as other page.
- the instructor made class as fun as possible as well as interesting.
- She always asked for participation in the class She explained things very clearly
- Zsuzsanna was a Very good instructor. She explained things well in class and if you did not understand in class she was always more than happy to help you sometime after class. She gave Fair tests with no surprises. Homework was reasonable. I Learned a lot. She is also very nice even if she doesn't seem like it in class. By far the best instructor I've had in college.
- This was a superb introduction to statistics. Zsuzsanna was organized and taught in an incredibly effective manner. She was very amicable and easy to approach with questions or concerns. Her tests perfectly followed the content presented in the text and in her teachings.
- Zsuzsanna (good thing her names on the page hehe) is great! She explained things well and was always there if a student needed help.
- the only suggestion I have is to completely explain or demonstrate the information before asking the class what to do next in a problem. it was very helpful that you have an open door policy besides office hours.
- The instructor was very willing to help and knew the material.
- She is definitely all of the above. She was fun and very effective with her teaching at the same time. I learned so much in this class and actually enjoy statistics now. She was really good at encouraging class participation and listening to what we needed help with the most.
- Zsuzsanna is an excellent teacher. Her step by step instruction is very precise

and clear. The way she gives assignment is appropriate and not overwhelming. This is something else but math tutor, Rollie, is an excellent tutor. He is so wonderful!
