University of Utah
Course and Instructor Evaluation Written Comments Report
Spring 2006

College/School: College of Science **Print Date:** 19-May-06
Instructor: HORVATH,ZSUZSANNA;
Subject: Mathematics **Course #:** 3070 - 004 **Enrollment:** 19
Course: Applied Statistics I **Evaluations processed:** 16

List two things about the course content, materials or design that were effective for your learning, or make constructive suggestions for improvement.

- The course accomplished everything that is set out to accomplish, I just dont find the relevance for someone like me. I felt as though I was taking a class for fun, not a class that taught me something. I think this class should be an optional course for those who plan to persue higher courses in statistics. To make everyone take it is a waste of our time and our money!!!!!!
- Being allowed to work with others in the class was helpful, as it simulates real world work.
- The instructor was able to effectively answer questions and teach the material
- This class was a joke. Why are we learning a software package that know one will have access to
- Teacher was great but the books was horrible. Exam and quiz questions were very different than books. The course covered a lot of material in a very little time.
- well organized. hands-on experience helped me understand the concepts

HORVATH,ZSUZSANNA: List two things about this instructor that were effective for your learning, or make constructive suggestions for improvement.

- I liked how the teacher reviewed at the beginning of class what to plan for(what's coming up)every time. I thought he did an excellent job with answering questions.
- Zsuzsanna was such a great instructor. we would come in every week and she would have everything nicely laid out for us, she would lecture and give hints for the appropriate module and then always answer our questions and help us through out the course. She is organized, friendly and she knows what she is doing, which was really helpful in a class that is really out of the scope of the statistics course work we did along with the lab. Thanks for getting me through the lab, Zsuzsanna, you are great!
- She said her job was already guaranteed for next year, so she didn't really care what we had to say,

but I think she did excellent, and I appreciate her particular approach to running SAS lab.

- She was very thoughtful, and very helpful. She was a better teacher than most of the professors that I have had at the U
- The instructor was very good about providing individual help when needed. I enjoyed an environment where I could solve lab assignments at my own pace.
- very helpful instructor. helped every student on a one-on-one basis. made sure we new and understood how to use the technology and understand our results
