**University of Utah**  
**Course and Instructor Evaluation Written Comments Report**  
**Fall 2006**

**College/School:** College of Science**Print Date:** 05-Jan-07**Instructor:** HORVATH,ZSUZSANNA;**Subject:** Mathematics      **Course #:** 1040 - 005**Enrollment:** 24**Course:** Intro Stat Thinking**Evaluations processed:** 15

List two things about the course content, materials or design that were effective for your learning, or make constructive suggestions for improvement.

- We were able to ask questions and the TA went over the materials in a different way that most of the time made it a little easier to understand.
- It was good to have a weekly review of the content, and one day of a smaller more interactive classroom.
- The course was designed so I could effectively get questions answered. The small class atmosphere made learning better.
- The supplemental class, lab, disertaion (or whatever you call it) was well organized and designed for us the students. I found the matieral to be great and supplemented the course well. It was very helpful to get additional ideas, opinions and insights to the course. Thanks
- she made lab worth going to..she was consistent with making the material easier to understand and was always willing to answer questions. her sessions were good and she made lab fun

HORVATH,ZSUZSANNA: List two things about this instructor that were effective for your learning, or make constructive suggestions for improvement.

- Zsuzsanna is great!
- She always answered your questions and made sure you understood the material. Great TA.
- Zsuzuanna is great, her sarcastic way of talking makes every class entertaining

- She was witty, creating a fun atmosphere. She helped clarify what I was having trouble with.
- Zsuzsanna (whose name I can't spell right for the life of me!) did a wonderful job in presenting the information for Stats. She was well prepared and organized, providing a good learning environment. I did enjoy her class each week and those weeks we didn't have it, I felt behind. She provided a great opportunity for supplemental learning! The only thing that I regret is that I didn't ask her for her phone number!! Surely, she is as disappointed as I am, but she knows my email is kentrlutz@gmail.com, so when she wants a stimulating conversation over stats, she knows where to find me!
- she was aware of who was trying hear and who really wanted to understand the material. i appreciated her help throughout the semester...she is ready to be a professor!
