PROJECT WORK**1. How well did your group work together on each of the following: (please check only one for each question)**poorfairgoodexcellent

sharing the work

discussing the ideas

listening to each other

developing a plan
for the project work**2. Do you enjoy the idea of doing projects in a math class as a means of demonstrating your grasp of the course as an alternative to the class tests and quizzes?** Yes No**3. Did your work on the project work help you understand and apply some of the course concepts? Be specific.** Yes No

Comments:

4. Did you learn anything useful or intriguing to you personally in doing the project? Be specific. Yes No

Comments:

5. What was the hardest part of doing this project? Be specific.

6. What would improve the project experience from your perspective? Be specific.

7. Many employers today complain that the students they hire are not prepared to understand written or verbal questions, to communicate their ideas clearly and logically, or to examine issues in a quantitative way. Do you think projects like the one you've just completed in this class will help students improve these skills?

Yes No

Comments:

8. Any additional comments?
