Math 2270 - Practice Exam 3

University of Utah Fall 2012

Name:		

This is a 50 minute exam. Please show all your work, as a worked problem is required for full points, and partial credit may be rewarded for some work in the right direction.

1. (9 Points) The Four Subspaces

- (3 points) The rowspace is the orthogonal complement of the
- (3 points) If an $m \times n$ matrix has a d-dimensional nullspace, then its rowspace has dimension ______.
- (3 points) For an $m \times n$ matrix A calculate:

$$dim(\mathbf{C}(A)) + dim(\mathbf{N}(A^T)).$$

2. (8 points) *Orthogonal Complements* - Find a basis for the orthogonal complement of the vector space

$$span\left\{ \left(\begin{array}{c} 1\\2\\3 \end{array}\right) \right\}.$$

3. (20 points) *Projections* - Find the projection of the vector **b** onto the column space of the matrix *A*:

$$A = \begin{pmatrix} 1 & 0 & 1 \\ 1 & 1 & 1 \\ 0 & 1 & 1 \\ 1 & 1 & 0 \end{pmatrix} \qquad \mathbf{b} = \begin{pmatrix} 4 \\ -1 \\ 0 \\ 1 \end{pmatrix}.$$

4. (15 points) *Linear Regression* - Find the least squares regression line through the points (1,1), (2,3), and (4,5).

5. (15 points) *Orthonormal Bases -* Find an orthonormal basis for the vector space

$$span\left\{ \left(\begin{array}{c} 1\\2\\0 \end{array}\right), \left(\begin{array}{c} 2\\0\\-2 \end{array}\right), \left(\begin{array}{c} 0\\1\\2 \end{array}\right) \right\}.$$

6. (8 points) *Properties of Matrices* - Using the three fundamental properties of the determinant (determinant of the identity is 1, switching rows switches the sign, linearity for each row) prove that a matrix with a repeated row has determinant 0.

7. (15 points) *Calculating Determinants* - Calculate the determinant of the matrix

$$\left(\begin{array}{cccc}
1 & -2 & 7 & 9 \\
3 & -4 & 5 & 5 \\
3 & 6 & 1 & -1 \\
4 & 5 & 3 & 2
\end{array}\right)$$

8. (10 points) *Other Ways of Calculating Determinants* - Calculate the determinant of the matrix

$$\left(\begin{array}{ccc}
4 & 0 & 2 \\
2 & 3 & 1 \\
3 & 1 & 5
\end{array}\right)$$

using a cofactor expansion along column 2.
