

Math2210 Final Review Problems  
Summer, 2008  
Dylan Zwick

From your book:

Chapter 14 Review Sample Test Problems (pg 774)  
#1, 2, 4, 5, 6, 8, 9, 12, 13

(Also, you can redo all the midterm review problems assigned previously. )

The test covers everything we've covered in this class. I can guarantee that there will be 3-4 problems on the test that cover chapter 14, since that hasn't yet been covered on a midterm. The rest of the exam will focus on the other stuff. If you want a good idea of what I think is important from the first 3 weeks, review your midterms and quizzes. :)

You can bring an 8.5 x 11 inch paper with notes (on both sides, if you want) to use as a reference. No calculator is necessary for this exam.
