Math2210 Final Review Problems
Summer, 2012
Dylan Zwick

From your book:
   Chapter 14 Review Sample Test Problems (pg 774)
            #1, 2, 4, 5, 6, 8, 9, 12

      (Also, you can redo all the midterm review problems assigned
      previously.)

The test covers everything we've covered in this class. I can
guarantee that there will be 3-4 problems on the test that cover
chapter 14, since that hasn't yet been covered on a midterm. The rest
of the exam will focus on the other stuff. If you want a good idea of
what I think is important from the first 3 weeks, review your midterms
and quizzes. You can also check out the final exams from the past
three years, all posted on the class website. :)

You can bring 4 sheets of 8.5 x 11 inch paper with notes (on both
sides, if you want) to use as a reference.   No calculator is necessary
for this exam.
