

Math Bio REU

How do single cells coordinate mechanical forces and move?

How is mathematics used in microbiology?

The Mathematical Biology program at the U is looking for:

- 2 math majors and
 - 2 biology, physics, or chemistry majors
- to work on a cellular motility research project during the 2015-2016 school year.

Do research! Get paid!

Put it on your grad school or job application.

Apply at www.math.utah.edu/research/mathbio/rtg/REUInfo.html

Application deadline: September 4, 2015
