Sierpinski Gasket Variation

The Twin Christmas Tree

Figure 5.9: IFS with three similarity transformations with scaling factor 1/2.

Figure 5.10: Another IFS with three similarity transformations with scaling factor 1/2.

A Dragon With Threefold Symmetry

Figure 5.11: The white line is inserted only to show that the figure can be made up from three parts similar to the whole.

The Cantor Maze

Figure 5.12: IFS with three transformations, one of which is a similarity. The attractor is related to the Cantor set.
