Instructor: Kelly A. MacArthur

Class Time and Place: 9:40 a.m. - 10:30 a.m.
Mondays, Tuesdays, Wednesdays, and Fridays
in JFB 103

Office Hours: Wednesdays 2:30 – 4:00 p.m., Tuesdays 1:00 – 2:00 p.m.,
or by appointment. We also have extra review sessions on Thursdays,
9:40-10:30 am in AEB 340.

Office Location: JWB 218
E-mail address: macarthur@math.utah.edu
Class Web Page: http://www.math.utah.edu/~macarthur (go to Current Teaching and our class)

Text: (1) Calculus with Differential Equations, 9th edition,
by Varberg, Purcell and Rigdon. ISBN: 0-13-230633-6
(2) My class notes which will be posted on my website. You will need to
print those out and bring them to class, because I'll refer to them
regularly. (Please note: You can print them in the Math Computer Lab
for no cost.)

Course Information: Math1220, Calculus 2 is a 4-credit semester course.

Prerequisite: At least a C grade in Math1210 or Math1250 or Math1270 or Math1310,
or AP Calculus AB score of at least 4 or AP Calculus BC score of at least
3 (within the last two years)
Important Note: The mathematics department DOES enforce
prerequisites for all our undergraduate courses. If you were able to
register for this class based on your enrollment in the prerequisite course
last semester, and you did not receive the minimum grade in that course
to continue on with your math classes, then you will be dropped from this
class on Friday of the first week of classes. If that is the case for you, then
it is in your best interest to drop yourself from this class before you are
forcibly dropped and get into a class for which you have the prerequisites.

Course Description: Geometric applications of the integral, logarithmic, and exponential
functions, techniques of integration, conic sections, improper integrals,
numerical approximation techniques, infinite series and power series
expansions, differential equations (continued).
Expected Learning Outcomes:
Upon successful completion of this course, a student should be able to:
• Compute derivatives and integrals for exponential, logarithmic, hyperbolic functions, and inverse trigonometric functions.
• Integrate integrable functions using integration by parts, u-substitution, trigonometric substitutions, rationalizing substitutions, partial fraction decomposition, and trigonometric identities. This includes knowing which techniques to apply to a given integral.
• Use L'Hopital's Rule to calculate indeterminate-type limits and also know what limits are the non-indeterminate forms and how to compute those limits.
• Compute improper integrals.
• Understand the difference between an infinite sequence and infinite series and determine if a sequence converges or diverges.
• Determine whether or not an infinite series of numbers converges or diverges using a variety of tests.
• Understand what it means for a Power Series to converge or diverge and be able to find the Taylor Series for a given function.
• Differentiate and integrate functions in polar coordinates.

Tutoring Lab: T. Benny Rushing Mathematics Student Center (adjacent to JWB and LCB), Room 155
M - Th  8 a.m. - 8 p.m.   and   F   8 a.m. - 6 p.m.
(opens Wednesday) (closed Saturdays, Sundays and holidays)
They are also offering group tutoring sessions. If you're interested, inquire at the Tutoring Lab. http://www.math.utah.edu/ugrad/tutoring.html

Private Tutoring: University Tutoring Services, 330 SSB
(they offer inexpensive tutoring). There is also a list of tutors at the Math Department office in JWB233.

Computer Lab: also in the T. Benny Rushing Mathematics Student Center, Room 155C.
M - Th  8 a.m. - 8 p.m.   and   F  8 a.m.- 6 p.m.
Link to computer lab is http://www.math.utah.edu/ugrad/lab.html

Grading: The grades will be calculated as follows:
Daily Quizzes   10%
Weekly Assignments 15%
Midterm 20%
Midterm 20%
Midterm 10%
Final Exam 25%
(Note: There will be 3 midterms. Your lowest midterm score will count for 10% of your grade and your top two midterm scores will each count for 20% of your final grade.)
**Homework:** There are homework problems assigned for each section of the book that we cover. You can access that list of problems at our class web page. It is important to do the homework problems even though I will not collect the homework. If you don't do the homework for practice, it is highly unlikely that you will pass the daily quizzes and exams. Practice makes perfect...or at least it makes you head in the direction of perfect. :) Observing someone else do the problems is VERY different from working the problems yourself!!

**Daily Quizzes:** There will be a 20-minute quiz on Canvas that opens every Monday, Tuesday, and Wednesday morning at 11:00 a.m. and closes the next day before class, including exam weeks. You will need to complete that online quiz on your time, outside of class hours, every Monday, Tuesday and Wednesday. Each daily quiz will be one to four questions about the material covered in class/video lecture that day. If you are keeping up with the work, these quizzes should be reasonably straightforward. There will be a total of about 40 of these quizzes. **I will drop the lowest eight scores.**

**Weekly Assignments:** There will be a total of 11 or 12 weekly assignments, posted on Canvas (in the Files tab, under the folder Weekly Assignments) by Thursday and due on Monday mornings, by exactly the time class starts. The weekly assignment will cover the material presented that week in class. Questions will be similar to text examples, class examples, assigned problems or harder conceptual problems. The weekly assignments will be much harder than the daily quizzes, assessing more of your big-picture learning than just one problem. **I will drop your lowest two assignment scores to create a buffer for any and all types of problems throughout the semester. There will be no additional compensations made for the weekly assignments and no exceptions to my policies regardless of how great your reason is that you cannot turn in your assignment on time.**

**IMPORTANT NOTE:** You must print the weekly assignment, from Canvas, double-sided on one piece of white paper. Your work needs to be written on that piece of paper. We will not grade anything on any other piece of paper, so do NOT staple your scratch work or other work to the quiz. The only work that will be graded is the work written directly onto the double-sided one sheet of paper that is the quiz. I cannot stress this fact enough.

Additionally, the weekly assignment is due at the beginning of class on the first class day of the week. By 9:45 a.m. every Monday (or first class day of the week), I will put the assignments in my backpack and then no other assignments will be accepted, under any conditions. I also will not accept assignments via email or any other electronic means. I will be consistently strict (and thereby fair) about this policy. There will be no late assignments accepted for any reason. Absolutely no exceptions. I am already dropping the two lowest assignment scores to account for any possible mishaps along the semester.
Midterms: There will be three one-hour midterm exams throughout the semester, and the dates are fixed, according to the course outline that is on our class web page. They will be during normal class time, in our usual classroom.

Final Exam: The final exam for this class is comprehensive and it will occur on Monday, December 12th, from 7:00 to 10:00 a.m. (Note: I'm starting the final exam an hour early to give you extra time.)

Online Grades: I will put your grades online on Canvas. You can get there easily from the main University of Utah website www.utah.edu. To log in, you use the same student id and password that you use for Campus Information System. I do my best to update the grades on a regular basis and keep everything accurate. However, I would advise you to check your grades often to make sure there were no data entry mistakes. I'm always happy to correct any mistakes I've made. You just need to let me know about them.

Calculators: You may find it helpful to have a graphing calculator for your own personal use. However, if I allow calculators on exams or quizzes, I will only allow scientific calculators (no graphing or programmable calculators will be allowed ever). Most of the time, you will not have use of a calculator on exams. This will be discussed more in class.

Grading Scale: Although I'm not philosophically opposed to curving grades, I find it's rarely necessary. The grade scale will be the usual: A (93-100), A- (90-92), B+ (87-89), B (83-86), B- (80-82), C+ (77-79), C (73-76), C- (70-72), D+ (67-69), D (63-66), D- (60-62), E (0-59). If I do need to curve the grades, I will simply shift everything down by a few points (whatever is necessary).

ADA Statement: The University of Utah seeks to provide equal access to its programs, services and activities for people with disabilities. If you will need accommodations in the class, reasonable prior notice needs to be given to the Center for Disability Services (CDS), 162 Olpin Union Building, 581-5020 (V/TDD). CDS will work with you and me to make arrangements for accommodations. All information in this course can be made available in alternative format with prior notification to CDS.

Student Responsibilities: All students are expected to maintain professional behavior in the classroom setting, according to the Student Code, spelled out in the Student Handbook. You have specific rights in the classroom as detailed in Article III of the Code. The Code also specifies proscribed conduct (Article XI) that involves cheating on tests, collusion, fraud, theft, etc. Students should read the Code carefully and know you are responsible for the content. According to Faculty Rules and Regulations, it is the faculty responsibility to enforce responsible classroom behaviors, beginning with verbal warnings and progressing to dismissal from class and a failing grade. Students have the right to appeal such action to the Student Behavior Committee. http://regulations.utah.edu/academics/6-400.php
Teaching Philosophy: I believe strongly that mathematics, at its core, is the art/experience/science of problem solving and pattern recognition. It is inherently a creative process, one to be struggled with, repeated, and enjoyed. The process requires imagination, persistence, courage, processing time, and ultimately produces experiential, mathematical skill. It is from this perspective that I teach. I'm not as concerned with the destination, i.e. the answer, as I am about the journey of problem-solving and mathematical exploration since it is exactly the entirety of the journey that creates the answer. And, self-confidence and mastery are then natural by-products of the mathematical journey.

Classroom Social Equity: I strive to be ethical, kind, fair, inclusive and respectful in my classroom and expect students to behave likewise. In this regard, I have these requests of you, my student:

1. Please inform me of whichever pronouns you prefer me to use for you. I will put great effort into honoring your request and ask that you correct me if I do happen to make a mistake.
2. Please do tell me, discreetly, if you have any sort of anxiety disorder, TBI, PTSD, C-PTSD, or any other challenge that would cause psychological harm to you by me calling on you in class. I want students to feel a little uncomfortable and stretched during class, while working on problems as a large group, but I definitely don't want to cause any human being harm. So, please just tell me if that is the case for you and I will confidentially accommodate your request.
3. If your preferred name is different than your legal first name (the preferred name you chose does indeed show up in CIS on my roll sheet, but not yet in Canvas), please log into Canvas and go to Account (on far left)--Settings and change your Display Name to be the name you prefer to be addressed by. This will help me greatly to know students' names, and to address you correctly when responding to Canvas quiz comments.

Additional Policies: Due to experience, I have decided to make some additional policies regarding my classroom administration and grading.

- I do NOT allow the use of laptop computers in my classroom, in order to minimize student distractions. At this point, it's almost impossible to take notes for a math class on a laptop in real time. Thus, it is unnecessary in class. If you are using a tablet or ipad or some similar device to take notes and the screen lies parallel to your desk, that is totally fine.
- There will be no retakes of exams, for any reason.
- You may take an alternate exam if you talk to me about it first and explain the emergent, extenuating circumstances that make it necessary. It is 100% your responsibility to communicate with me as soon as is possible, before the exam occurs (or as soon as possible). Talking to me after the problem will be sufficient reason for me to allow you to get a zero on that test. I reserve the right to make alternate exams more difficult than the scheduled exam.
- I will kindly demand respectful behavior in my classroom. Examples of disrespect include, but are not limited to, reading a newspaper or magazine in class, social chatting with your friend in class, text-
messaging during class, excessive use of your cell phone or cuddling with your girl/boyfriend in class. If you choose to be disrespectful with distracting behavior during our class, please keep in mind that you put me in a position of choosing between protecting/taking a stand for you OR for the other students or myself whom you are disrupting. I can guarantee I will choose to stand for the students who are there to learn without disruptions and I will thus take action to terminate your distracting behavior, and that action may not be desirable for you.

- There will be no cursing nor negative ranting (for example, “math sucks”) on any written work turned in. The penalty for such things on your written work will be a zero score on that assignment or test.

- You need to have a valid email address registered with Campus Information System. I will regularly send emails to the class and will hold you accountable for receiving that information. If you have troubles receiving my weekly emails, you can (1) check to make sure your email address at Campus Information System is correct, (2) make sure my emails are not going directly to your junk mail folder, or (3) contact the webmaster at Campus Information System.

- If you have crisis-level extenuating circumstances which affect your class performance and you need guidance/advice/flexibility, it is completely your responsibility to communicate with me as soon as possible so I can help you in some manner, which I'm truly happy to do. The longer you wait to communicate with me, the less I can and am willing to do to help.

- If you have questions about any exam/quiz/homework grade, or you want to appeal the grading of the exam/quiz/homework, you must bring it to me within one week of the exam/quiz/homework. I'm happy to look over your appeal and/or questions and give my feedback in order to benefit your learning. But, it must be done in this timeframe of a week from when I hand back the exam/quiz/homework.

- Please make sure you do your best throughout the semester, knowing the grading scheme and what's expected of you, and come talk to me if you need further study strategies. I will be happy to brainstorm ideas to help you maximize your study strategies and improve your mathematical understanding. I will offer an extra credit question on every midterm and final exam, to help make up for arithmetic mistakes. But, I will not offer any additional extra credit at the end of the semester or any other way for you to improve your grade at that time. No exceptions. Please respect this and do not ask for special favors or extra credit when you realize you don't like your grade. Most likely, I just won't respond to such emails or questions in person.

- If you cheat on any homework, project, quiz or exam, I will automatically give you a zero for that grade. Depending on the severity of the cheating, I may decide to fail you from the class. Please note that the use (or even just pulling it out of your pocket) of a cell phone or any other electronic internet device is considered cheating and cause for receiving an automatic zero on any quiz or exam. Also, if you exhibit any other behaviors that are unethical, like offering me a bribe to give you a better grade (even if you later claim you were joking), I will report your behavior to the Dean of Students.

I reserve the right to change my policies stated in this syllabus at some point in the semester. If I do make a change to a policy, I will announce it in class and send the change in email.
