

Challenge #2

Edna Paisano had three jugs for her tea bags. In one she had green tea bags for medicinal purposes, in one she had black tea bags for ceremonial purposes and the third jug had a mix of the two. All three jugs are mislabeled. Poincare came for tea and said, "By selecting only one tea bag from one jug, I can correctly place the labels."

How did he do it?

Challenge #2 Solution

All jugs are mislabeled. Poincare draws one tea bag.
