Instructor	Text Responses
	<p><b>Question: Comments on course effectiveness</b></p> <p>1. Worksheets, TAs, review sessions 2. Online lecture videos</p> <p>helpful &amp; informative</p> <p>I really like the daily quizzes and the weekly assignments.</p> <p>This course, coming from someone who didn't give calculus a good chance, going straight into calculus 2 gave me pause at first. But, the course's material, combined with the flipped class structure really helped me succeed.</p> <p>I loved both the flipped class structure and the group portion of exams, those were incredibly helpful to my learning.</p> <p>Kelly MacArthur was an extremely patient and helpful teacher. She truly made this class enjoyable. Her reverse classroom made it easier to understand the material. She was very good at answering any questions the class had for her and her explanations were extremely helpful.</p> <p>Loved the flipped classroom!!</p> <p>The weekly reviews with the TAs was extremely helpful. Also if you do the suggested homework problems daily they are also very helpful.</p> <p>The flipped classroom and the group tests were two of the effectl've elements of this class</p>
	<p><b>Question: Instructor Comments</b></p> <p>1. Very straightforward in her teaching and on exams/assignments. Very organized course and fair grading as well. 2. The instructor was very engaged and interactive with all her students to make sure they are learning and are comfortable with the class. Very impressive considering she has hundreds of students in her classes.</p> <p>helpful &amp; informative</p> <p>I really like Kelly's teaching style; she makes fairly difficult concepts easy to understand. I know Kelly is probably very busy but I feel like it might help to have someone double-check things like daily quizzes, as there were several mistakes on them throughout the semester.</p> <p>The instructor was not only really clear and provided multiple methods to solve different problems, but also encouraged working together with other students. These alone helped me drastically improve in this class.</p> <p>Kelly was excited about the material and had very useful analogies.</p> <p>I appreciated how she would as us to help solve problems in class. It was so good to see how other students solved the math problems or even how they messed up because it helped me learn the material better. I also liked how she would send out weekly announcements. They were great reminders for what was going on in the class and also what she expected from us.</p> <p>When questions were asked she answered them kindly and with great patience. She never made you feel like your questions were stupid and you could tell she really cared about the students in the class and their learning. She gave us time to work out problems on our own and discuss with our peers, but would also explain it to us after.</p>
	<p><b>Question: Feelings about math</b></p> <p>Yes, I enjoyed doing math in this class and was not overwhelmed at any point in the course. It made me believe that math is a very doable subject. This professor was excellent in teaching this course.</p> <p>Good attitude still a challenging course</p>

MacArthur	I don't think it has changed, but I liked math before and I still like math so I think that's a good thing!
MacArthur	My confidence has improved drastically. I really think that, going forward, I will be able to do much better in math.
MacArthur	I've been excited about learning mathematics again since I started in 1050 and this course has only reinforced my interest. I look forward to learning much more in Calc III.
MacArthur	Kelly MacArthur has mad me enjoy math so much I am almost regretful that I will not be taking Calculus III with her next semester.
MacArthur	My attitude has not changed, I still love math.
MacArthur	I think I love math even more after this class. Having a great professor definitely helped with that. The effort it required to do well in this class made it a very rewarding class.
