Instructor	Text Responses
	Question: Comments on course effectiveness
	I personally really liked focusing on the testing aspect more than grading homework because it gave me more freedom to pick which problems to do if I felt weak on a certain topic and skip another topic. I also like the flipped classroom which allowed me to rewatch lecture videos before tests.
	videos and group work
	The cheat sheets posted on her website from previous years were an extremely helpful studying tool, as well as the extra videos and tests available to us as well. I also liked that we mostly did examples in class. All the practice was invaluable. Possibly starting the quizzes directly after going over the previous day's homework would be better as opposed to starting it in the middle of class. Then our focus hasn't yet been shifted onto new subjects. It's hard to remember what you can and can't do, as far as using new techniques on the quizzes, when we've already moved so far ahead in new material each day.
	The videos were very helpful. I also liked the group quizzes.
	Really enjoyed how she brought treats, made me motivated. Also that she was so dedicated to her students made me feel appreciated for wanting to learn the course.
	MAKE CALC 3 A FOUR CREDIT CLASS!
	speed and organization were perfect... on fleek! with that being said calc III was really hard... kelly is perfect
	The accelerated learning process was very good for my learning, and the textbook used was helpful to use if I was confused about anything in the class.
	Question: Instructor Comments
MacArthur	She is very methodical in her approach to the class. She is very good about gauging our understanding of the concepts, and moving ahead or slowing down as need be. She knows how much time it takes to fully learn the material, and knows exactly how to portion each section so that we can learn effectively.

MacArthur	Being slightly younger than most other's I found the instructor to be extremely welcoming. She was easy to have a conversation with beyond just being a lecturer. Additionally she was always open to discussing problems which made learning a lot easier.
MacArthur	videos and group work
MacArthur	Pausing to do work on questions was good because it made it hard to not pay attention for a long time and got my head working on the problems before I got to the homework.
MacArthur	Great teacher except it was hard for me as an individual to understand 3-D in a 2-D perspective ... Wish there were 3-D things offered so students can understand more clearly.
MacArthur	I loved your class Kelly!
MacArthur	caring and smart and happy and energetic and enthusiastic and fun and good at getting through a lot of material really really quickly
MacArthur	Kelly Macarthur was a fantastic teacher and she thoroughly understood the material, as she was able to explain the coursework to everyone.
