Instructor	Text Responses
	<b>Question: Comments on course effectiveness</b>
	group quizzes and daily quizzes
	The lecture videos were great! The group quizzes and exercises helped me learn a lot better than traditional teaching techniques.
	Group quizzes and friendly environment.
	Kelly MacArthur is an outstanding professor and person. She genuinely cares about your success and believes in you the way that all professors should. She's straightforward with you and is totally willing to change the organization of the course to better fit the needs of the individual class depending on their needs while maintaining a standard for her students that allows them to be successful in learning the material and getting a good grade.
	The videos were super helpful. I also liked the flipped classroom.
	The class notes (the examples in them) and the group quizzes.
	<b>Question: Instructor Comments</b>
MacArthur	she was amazing at explaining concepts and her attitude for class and the students was great
MacArthur	Kelly paid personal attention to each student to make sure they understood the material. She was very flexible with the processes used to reach the answer to each problem.
MacArthur	Kelly is what makes calculus great. Her enthusiasm for mathematics, learning, and each and every individual student is what makes calculus enjoyable.
MacArthur	She would make hard information easier to interpret and was also very easy to talk to and always willing to help.
MacArthur	Kelly is one of the best teachers I have ever had. She is inclusive and goes out of her way to make her students feel comfortable. I loved the pace and would want to take more fast paced classes. Especially if there are taught by her.
MacArthur	I liked that she picked out a group at random and encouraged people in that group to speak up regardless of if their ideas were right. I wish that the group portions of the exams had not been so heavily weighted.
